Average Number of Stores in Operation.....	3946	4062	— 116

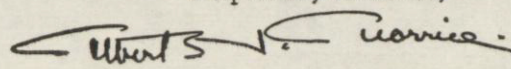

**SALES AND EARNINGS**—Sales were up 2% and, calculated on the decline in the commodity price level, tonnage increased approximately 5%. (The Government Index shows that average retail food prices were 3% below the same period of 1938.)

While the gross profit ratio in the stores was down, yet it was possible to show an increased net profit, due to increase in sales volume, continued improvement in operating efficiency, and increased acceptance of Kroger Manufactured Products.

**FINANCIAL CONDITION**—Your company's cash position is the best in its history. Your company has been following a conservative policy with respect to merchandise inventories.

Since our last report, there has been no enactment of Discriminatory Chain Store Tax Laws in our territory, and the Supreme Courts of Pennsylvania and Kentucky have declared unconstitutional Discriminatory Chain Store Tax Laws that were in force in these states.

Respectfully submitted,

President
